# Submission Worksheet

## Submission Data

**Course:** IT265-002-S2026
**Assignment:** IT265 Case Study - Personal Choice
**Student:** Wilbert C. (wc53)
**Status:** Submitted | **Worksheet Progress:** 100%
**Potential Grade:** 10.00/10.00 (100.00%)
**Received Grade:** 0.00/10.00 (0.00%)
**Started:** 4/27/2026 11:52:10 PM
**Updated:** 4/27/2026 11:52:10 PM
**Grading Link:** https://learn.ethereallab.app/assignment/v3/IT265-002-S2026/it265-case-study-personal-choice/grading/wc53
**View Link:** https://learn.ethereallab.app/assignment/v3/IT265-002-S2026/it265-case-study-personal-choice/view/wc53

## Instructions

Step 1: Pick a game you plan to analyze

Step 2: Playtest your game choice (or review streamers playing the game)

Step 3: Analyze, research, and review your chosen game. Collect resources (website links, etc that you used during the exploration) include these with the responses in the related sections. Fill in the responses of the below prompts/checklist/etc.

Step 4: Export the PDF. Upload it to Github and upload the same PDF to Canvas.

# Section #1: ( 1.25 pts.) Game Overview

Progress: 100%

### Task #1 ( 0.63 pts.) - Historical Context and Game Description

Progress: 100%

**Details:**

- Game's title, developer, publisher, platform, and release date.
- Historical context of the game's release and its place in the industry.
- Game's genre and how it compares to similar games of the time.

Your Response:

- Fortnite was released by Epic games and people can fly released Fortnite July 25, 2017

- not many games can claim to have been as commercially and culturally relevant as Fortnite. I like to think Fortnites release had a big impact on why it was so popular, it was released in the middle of summer 17 right after historic summer 16 that people still talk about today(in memes).Fortnite's success is also partly due to it being free to play and playable on all media devices(ps4,xbox,pc,nintendo,mobile) and also because every big streamer was playing the game which brought in a lot of traction, It was a space where creators, fans and celebrities can meet.
- Fortnite is a Third person shooter Battle Royale game and can also be seen as open world. The way it stood out to similar games of the time like pubg and H1Z1 is that fortnite incorporated a unique builidng mechanic that allowed players to build cover with materials that are farmed on the BR map.

## Task #2 ( 0.63 pts.) - Gameplay Mechanics

Progress: 100%

**Details:**

- Discuss the core gameplay mechanics and how they shape the player's experience.
- Explain how players control the game and interact with it.
- Identify and describe any unique aspects or creative elements in the game's gameplay.

Your Response:

- Fortnite's core mechanic allows players to build shelters and stairways using materials they collect from around the map. This adds a completely new way of playing as it allows players to build bases and walls to stop being attacked. This shaped the players experience because with this new mechanic in the market creators and players were trying new ways and creating metas around it which led to infinite ways to use/exploit the mechanic. Its what keep players coming back to the game, it was a fun mechanic to try and get good at.
- Like I said before the building mechanic controlled the game because once you built you could cover yourself with your builds or even if you were a really good player you use your builds to work as an attack instead of defense. Some people would use builds to block off certain spots on the map and even camp in them.
- Fornite also had seasons and an item shop with skins that updated everyday at 8:00.
  later in the years fortnite incorporated a story narative with their seasons. Its story is structured just like a seasonal TV show. With each new season comes new challenges, outfits, themes and cosmetics. The storyline also effected how the map would look in that new season. Fortnites item shop is known to recycle and refreshe pop and online cultures. Some of the Fortnite dances are original,

but the most talked about are inspired by other popular pieces of content. as well as skins, there are skins for anything you can think of; Kim kardashin, Dragon Ball Z, Lebron James, SpiderMan, theres so much.

# Section #2: ( 1.25 pts.) Software Architecture And Technology

Progress: 100%

## Task #1 ( 0.63 pts.) - Technical Framework

Progress: 100%

**Details:**

- Describe the game engine and any special software (middleware) used to make the game. Explain why these were important for making the game work.
- List the programming languages and software tools used to build the game. Discuss how these tools helped in creating the game's features.

Your Response:

Fortnite uses Unreal Engine. It was created on Unreal engine 3. Unreal engine was used because Epic Games owns it, the engine was optimized specifically to meet Fortnite's unique requirements.

Fortnite is written in C++ and Blueprint. Unreal 4 mainly uses HLSL. They may have used some JSON in the game as well, since Unreal 4 has support for that.

Saved: 4/27/2026 11:20:37 PM

## Task #2 ( 0.63 pts.) - Innovations and Challenges

Progress: 100%

**Details:**

- Identify and describe any new or unique technical features in the game. Explain how these features made the game different or improved it.
- Discuss any major difficulties the developers encountered while making the game. Describe how they solved these problems.

Your Response:

Recently Fortnite added sliding, Tactical Sprint, Tatical Sprint jump, and mantling, this made the game even more sweaty, it took a while for players to get used to it but once

they did fortnites skill gap got much harder to keep up with.

there were some engine transition issues going from engine 3 to engine 4.

Saved: 4/27/2026 11:24:03 PM

# Section #3: ( 1.25 pts.) Gameplay Mechanics And Level Design

Progress: 100%

## Task #1 ( 0.63 pts.) - Mechanics Analysis

Progress: 100%

**Details:**

- Explore and describe the main rules and actions that players use in the game. Explain how these core mechanics define the game's playstyle.
- Discuss how the game's core mechanics keep players interested and involved. Describe the ways these mechanics make the game fun or challenging.

Your Response:

like it was said before Fortnite recently added sliding, Tactical Sprint, Tatical Sprint jump, and mantling, this made the game even more sweaty, it took a while for players to get used to it but once they did fortnites skill gap got much harder to keep up with. Also when the game first started players hardly used to build because they werent used to it and werent good at it, nowadays everyone is amazing at building and knowing when and what to build and where to place it.

Saved: 4/27/2026 11:26:01 PM

## Task #2 ( 0.63 pts.) - Level Design

Progress: 100%

**Details:**

- Describe the design of the game's levels or environments. Focus on the layout, obstacles, and visual elements, and how they contribute to the game's setting.
- Explain how the level or environment design affects the way players play the game. Discuss how these design choices impact the overall experience, such as creating challenges, guiding the player, or setting the mood.

Your Response:

fortnite had few obstacles in the game, because with the building mechanic, you basically could've gone and over anywhere/anything. Its circle storm/zone mechanic influenced how players played the game because of the zoom players will always try to get highground on a mountain, building, or their own builds instead of lowground

Saved: 4/27/2026 11:28:46 PM

# Section #4: ( 1.25 pts.) Graphic And Audio Design

Progress: 100%

## Task #1 ( 0.63 pts.) - Graphic and Audio Design

Progress: 100%

**Details:**

- Describe the game's visual appearance and the artistic choices made. Discuss elements like color, art style, and thematic consistency, and how they contribute to the game's overall look and feel.
- Discuss the design of the game's characters and environments. Focus on aspects such as realism, creativity, and how they fit within the game's world. Explain how these designs enhance the player's immersion in the game.

Your Response:

The colors used in fortnite are vibrant and rarley dull. and the art and graphics they used are nice and cartoony which makes it amazing for all ages to play. the realism of the skins and the way the players moved was also well done.

Saved: 4/27/2026 11:30:07 PM

## Task #2 ( 0.63 pts.) - Audio Design

Progress: 100%

**Details:**

- Examine the game's sound design, focusing on the music and sound effects. Describe how they are used and their quality. Discuss any memorable or unique audio elements in the game.
- Explain how the game's audio contributes to its overall mood and setting. Discuss how sound and music influence the player's emotional response and enhance the gaming experience.

Your Response:

Fornite allowed you to buy music soundtracks you can use, also when playing you can hearthe waves and when your building you can hear that. The audio contributes to the overall mood immensly. I remember when they do the christmas theme around christmas It always brings me back to DEC 2018 and put me in the christmas mood.

Saved: 4/27/2026 11:34:08 PM

# Section #5: ( 1.25 pts.) User Interface And User Experience

Progress: 100%

## Task #1 ( 0.63 pts.) - User Interface and User Experience

Progress: 100%

**Details:**

- Describe the layout of the game's user interface (UI) and how it functions. Discuss elements like menus, icons, and on-screen prompts, and how they help players navigate and understand the game.
- Evaluate how well the game's UI communicates important information to players. Discuss aspects such as clarity, readability, and the ability of the UI to provide necessary game details without overwhelming or confusing the player.

Your Response:

Fortnite UI used to be easier to read then how it is now. There were tabs, locker, shop, battle pass, compete, vbucks, and career. on whichever tab you click on it shows minimal and enough info to not overwhelm the player

Saved: 4/27/2026 11:36:05 PM

## Task #2 ( 0.63 pts.) - UX Analysis

Progress: 100%

**Details:**

- Discuss the overall feel of playing the game, focusing on how different aspects of the game contribute to the player's experience. Analyze how these elements, such as ease of use, game flow, and feedback, affect the gameplay.
- Evaluate the design decisions made to enhance the player's experience. Consider factors like tutorial design, learning curve, and player engagement. Discuss how effective these choices are in making the game enjoyable and accessible to players.

Your Response:

The experience provided by Fortnite is very dynamic and vivid. Thanks tothe mechanics and parkour movements, and immediate feedback, such as a notification on eliminating an opponent or a victory message at the end of the battle, players are consistently being kept entertained and notified about their current state. As well as the victory royale screen when you won a game would be posted all over your social medias once you got it wish pushed you to play more because everyone was getting it.

Saved: 4/27/2026 11:39:53 PM

# Section #6: ( 1.25 pts.) Narrative And Storytelling

Progress: 100%

## Task #1 ( 0.63 pts.) - Narrative Structure

Progress: 100%

**Details:**

- Describe the game's story, including its narrative structure, main plot points, and the setting in which it takes place. Discuss how these elements come together to create a cohesive and engaging story.
- Analyze the storytelling techniques used in the game, such as dialogue, cutscenes, or environmental storytelling. Evaluate how effectively these techniques convey the story and engage the player.

Your Response:

The narrative of Fortnite occurs in a multiverse, in which the central focus is the mysterious island. Various factions, such as the IO and The Seven, fight against each other for control over the Zero Point – an area on the island filled with reality-warping energy. This storyline is presented to the player in a number of different ways, such as black holes eating away at the map or rifts rending the fabric of reality itself. What separates Fortnite from other games, however, is that its main character is the island itself – and with every season of new live events, that character develops in its own unique way.

Saved: 4/27/2026 11:41:59 PM

## Task #2 ( 0.63 pts.) - Character and Integration

Progress: 100%

**Details:**

- Discuss the development of the game's characters. Describe their roles within the story, their personalities, and how they evolve throughout the game. Consider how the characters contribute to the overall narrative.
- Examine how the game's narrative and characters are integrated into the gameplay. Discuss how story elements are woven into the game mechanics and how this integration affects the player's experience.

Your Response:

characters and their personalities in the game mechanics.11:42 PMClaude replied: Characters of Fortnite include both original creations such as The Foundation (stoic and enigmatic leader of The Seven whose voice actor is Dwayne Johnson) and endless licensed crossovers, yet it's the latter who tell the story – the characters like Dr. Slone, IO's cold-blooded commander bring life to the conflicts in the game. Character development mostly occurs through passive means, such as seasonal quests, interactions with NPCs and loading screens, but not through traditional cut-scenes so that players get to appreciate this extra layer of content, yet those who choose not to are not missing out much either because it does not affect the gameplay. The storytelling is integrated with the gameplay so well that the boss characters of Fortnite become playable on-map NPCs whom the player can fight or recruit for the team, places with special lore meaning become actual locations where the player can drop and land in-game events have their effects on the map itself.

Saved: 4/27/2026 11:42:47 PM

# Section #7: ( 1.25 pts.) Impact And Reception

Progress: 100%

## Task #1 ( 0.63 pts.) - Reception and Impact

Progress: 100%

**Details:**

- Research and summarize how the game was received by critics and players. Include key reviews, ratings, and player feedback. Discuss any notable praise or criticism the game received.
- Analyze the game's impact on the gaming industry. Discuss how it may have influenced game design, trends, or inspired other games. Consider any lasting effects it has had on the industry.

Your Response:

Critics praised Fortnite at launch for its unique blend of building and battle royale gameplay, with Metacritic reviewers noting that mastering Fortnite's many systems is worth the investment, and that its zany style and unique blend of shooting and building almost never offers anything less than an outstanding time. Player reception has been more divided over the years longtime fans frequently criticize the game's

heavy monetization, inconsistent matchmaking, and the overwhelming number of crossover collaborations, while casual players still praise its accessibility and constant fresh content. Despite the mixed player feedback, Fortnite has won awards like Best Multiplayer/Competitive Game at the Golden Joystick Awards and several Game Awards for ongoing community support. On the industry side, Fortnite's impact is hard to overstate. it essentially popularized the free-to-play battle royale model, the live-service seasonal update structure, and the cosmetic only monetization approach that dozens of games have since copied, from Apex Legends to Call of Duty: Warzone. It has generated over $20 billion in revenue despite being free to play, placing it firmly among the top five highest grossing games of all time, proving that a game doesn't need to sell copies to dominate the industry financially.

Saved: 4/27/2026 11:45:23 PM

## Task #2 ( 0.63 pts.) - Cultural Significance

Progress: 100%

**Details:**

- Examine the game's cultural significance and the legacy it has left behind. Discuss how the game has been remembered over time and its status in the gaming community.
- Describe the game's presence and representation in media, such as films, books, or online content. Discuss its role in fan communities and any influence it has had on broader cultural aspects, such as art, music, or social trends.

Your Response:

It evolved beyond gaming into a true cultural sensation; the dances within the game were viral on social media, live concerts featuring Travis Scott and other artists attracted millions of players at once, and many children learned the concept of crossover marketing via Fortnite character skins. It fundamentally changed the way the industry looked at live-service games, showcasing that continuous seasonal updates, cosmetic purchases, and cross-platform play could support a title for almost a decade while earning billions of dollars. Fortnite's legacy is clouded by the fact that long-time players consider it no longer to be a game due to its extreme commercialization; however, its cultural impact is clear based on the presence of dances and memes on Tiktok, communities on Reddit, and competitive events in the form of esports. Furthermore, Fortnite expanded past gaming and became part of documentaries, merchandising, and pop culture discussions regarding the potential dangers of video games and online social environments. Lastly, its Creative Mode even created an entire ecosystem of content creators who earn money through their videos and interactions within the game, essentially turning it into a platform instead of a game.

Saved: 4/27/2026 11:47:10 PM

# Section #8: ( 1.25 pts.) Reflection

Progress: 100%

## Task #1 ( 0.63 pts.) - Describe your personal experience playing the chosen game

Progress: 100%

**Details:**

- Was it "fun"? What made it fun or not fun?
- Is this genre/game-type aligned with personal interests?
- What made you pick this game? Was it a good choice?

Your Response:

Fortnite was my favorite game since it came out. I even wanted to get better at it that i went from console to pc kbm and even competed in some tournaments and did well, it was very fun to me to learn the mechanics and get better at them. I picked this game because i knew it is unique with its building mechanic and its a game a lot of people will admit that its prime will always be unmatched, and as i said before it was my favorite game maybe still is to be honest

Saved: 4/27/2026 11:49:28 PM

## Task #2 ( 0.63 pts.) - Assignment Reflection

Progress: 100%

**Details:**

- What interesting or new "thing(s)" did you learn during your research and analysis?
- Did you find it was easy to come across the information you were looking for? What was your primary means of research/analysis?

Your Response:

Interesting thing i learned is the tools and programming languages epic games used to make fortnite. and yes it was easy to come across this information. google was my primary means of research and AI was used for help.
